DETAILED ACTION

1. Receipt of the Request for Continued Examination (RCE) filed 2/18/2009 is acknowledged. Claims 21-23 and 25-29 remain pending in the application and are presented to be examined upon their merits.

Response to Arguments

2. Applicant's arguments in applicant's remarks, see, filed 11/03/2008 with respect to 35 USC 103(a) have been fully considered and are persuasive. The rejections of claims 21-23 and 25-29 has been withdrawn. However, other claims are maintained below.

Claim Rejections - 35 USC §101

3. 35 U.S.C. §101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 21-23 and 25-29 are rejected under 35 U.S.C. §101 because the claimed invention is directed to non-statutory subject matter.

5. Based on Supreme Court precedent (*Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876)) and recent Federal Circuit decisions, §101 process must (1) *be tied to another statutory class (such as a particular apparatus)* or (2) transform underlying subject matter (such as an article or materials) to a different state or thing (the

Supreme Court recognized that this test is not necessarily fixed or permanent and may evolve with technological advances. *Gottschalk v. Benson*, 409 U.S. 63, 71 (1972)).

6. If neither of these requirements is met by the claim(s), the method is not a patent eligible process under 35 U.S.C. §101.

7. In this particular case, regarding the first test, in performing the steps of the claimed subject matter, thus the claims are not considered sufficiently tied to another statutory class. It also may be interpreted that the limitations merely provide a set of software instructions in the form of functionally descriptive material. “functional descriptive material” consists of data structures and computer programs which impart functionality when employed as a computer component. (The definition of “data structure” is “a physical or logical relationship among data elements, designed to support specific data manipulation functions.” The New IEEE Standard Dictionary of Electrical and Electronics Terms 308 (5th ed. 1993).) When functional descriptive material is recorded on some computer-readable medium, it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized. Compare *In re Lowry*, 32 F.3d 1579, 1583-84, 32 USPQ2d 1031, 1035 (Fed. Cir. 1994) (discussing patentable weight of data structure limitations in the context of a statutory claim to a data structure stored on a computer readable medium that increases computer efficiency) and *In re Warmerdam*, 33 F.3d 1354, 1360-61, 31 USPQ2d 1754, 1759 (claim to computer having a specific data structure stored in memory held statutory product-by-process claim) with *Warmerdam*, 33 F.3d

at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory). (see MPEP 2106.01).

Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 21-23 and 25-29 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: structural elements (i.e. device or computer) elements associated with the steps cited as part of the method claim(s). For example, what are the hardware components that provide the method steps?

Allowable Subject Matter

10. Claims 21-23 and 25-29 would be allowable if rewritten or amended to overcome the rejection(s) under 35 USC §101 and 35 U.S.C. 112, 2nd paragraph, as set forth in this Office action.
